

IDREES KHAN

Software Engineer

Swat, Khyber Pakhtunkhwa, Pakistan | +92 320 8006787 | idreekhan122@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented Software Engineering graduate (University of Swat, 2026) with a solid foundation in web development, Python programming, prompt engineering, and data analysis. Hands-on project experience building full-scale software systems, including a Django-based offline Point of Sale application and a Next.js-based School Management System developed as a final year project. Skilled in automating repetitive workflows using AI tools and providing customer email support, with strong organizational skills built through hands-on experience in data entry. Seeking an entry-level software engineering or IT role to apply strong problem-solving skills, adaptability, and a fast learning mindset within a professional team environment.

CORE SKILLS

- Data Analysis with Python (Pandas, NumPy, data cleaning & visualization)
- Web & Software Development (Python, Django, React.js)
- Prompt Engineering (designing & optimizing prompts for AI tools)
- AI Automation (workflow automation using AI tools & APIs)
- Customer Email Support
- Web Design — HTML & CSS (fundamentals)
- Graphic Design
- Microsoft Office (Word, Excel, PowerPoint)
- Strong Organizational & Communication Skills

EDUCATION

Bachelor of Science in Software Engineering 2022 – 2026

University of Swat • CGPA: 3.14 / 4.0

Intermediate (Pre-Engineering) 2021 – 2022

Jahanzeb College, Swat

PROJECTS

Point of Sale (POS) Software — Django

Self-Directed Project

- Built a fully offline Point of Sale system using Django, enabling sales, billing, and inventory management without an internet connection.
- Designed the backend data models and workflows to keep the application fully functional in low-connectivity environments.

School Management System (SMS) — Next.js

Final Year Project (FYP)

- Developed a School Management System using Next.js as final year project to digitize and streamline core school administration processes.
- Implemented modules to manage student records, attendance, and academic workflows for administrators, teachers, and students.

EXPERIENCE

Fresher — Actively Seeking Entry-Level Opportunities

- Applied web design, Python-based data analysis, and workflow automation through academic and self-directed projects.
- Handled customer email support, responding to queries and managing correspondence in a timely, professional manner.
- Managed data entry tasks with strong attention to detail and time management.
